

SILENT VISION

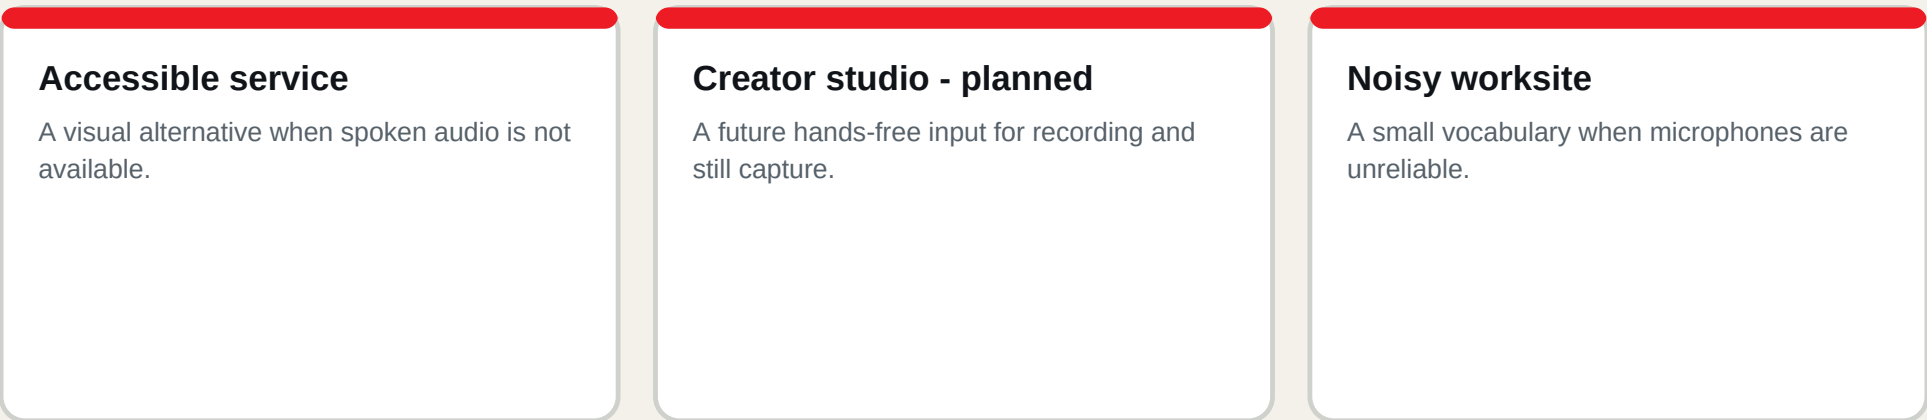

Silent control when audio is not an option.

Closed-set visual command recognition from a short camera clip.

HOW IT WORKS

WHERE IT FITS

SAFETY RULE

Low-confidence and ambiguous commands do not execute.

AMD RADEON + ROCM

Intended demo path: CPU video preprocessing, then PyTorch temporal classification on AMD Radeon through ROCm.

EVIDENCE STATUS

Final Radeon run, trained checkpoint, validation evidence, Creator Mode actions, and recorded demo are pending.
